

## Economic Impact Survey 2009: Food Bank Response

### How current economic conditions are impacting the emergency food system served by Freestore Foodbank

Feeding America is the nation’s largest domestic hunger-relief organization, serving an estimated 25 million low-income Americans each year through its network of 205 food banks and their 63,000 charitable feeding agencies, including food pantries, soup kitchens, and homeless shelters.

The current recession and the rise in unemployment are having a profound effect on the nation’s food banks. In early September 2009, Feeding America conducted a brief survey of food bank members to learn more about the challenges faced by food banks, their member agencies, and clients served. A total of 176 food banks participated in the survey. What we found was that 99% of all participating food banks reported increases in demand for emergency food assistance over the last year. The average increase in demand across the network from Summer 2008 to Summer 2009 was 30%. However, the increase in need for services over the last year varies across the nation, ranging from 5% in some areas to more than 150% in others. Local economic circumstances, such as plant closings, can have a significant impact on need but it is also clear that high unemployment across the nation – which reached 9.7% in August – is a critical factor in the rising need for emergency food.

It’s becoming increasingly more difficult for many food banks and their agencies to meet the needs of their clients, especially when new clients arrive all the time. Despite the fact that the nation’s food banks delivered 2.63 billion pounds of food between July 2008 and June 2009 – an increase of 21.4% over the prior year --many are struggling to meet this increase in demand.

Here is a snapshot of what Freestore Foodbank has witnessed and reported over the past year in the community it serves.

<p>Estimated increase in demand or need for emergency food assistance:</p>	<p>There has been an approximate 32% increase between June 2008 and June 2009 in service requests. Between July 2008 and July 2009, there was an increase of 35% in clients served.</p>
<p>Local factors impacting changes in demand:</p>	<p>We are seeing increased need in assistance for emergency food and other services in both urban and rural counties served by the Freestore Foodbank. In large part this may be attributed to the hard economy of the past couple of years. While our local community has been generous, especially through funds donated, this has not been able to keep pace with the dramatic increase in demand from the community.</p>

<b>Critical trends contributing to increased need for emergency food:</b>	<b>Unemployment</b> <b>Underemployment</b> <b>Cost of Food</b> <b>Cost of Fuel</b> <b>Cost of Health Care</b> <b>increased Utility Costs</b>
<b>Client trends include:</b>	<b>More requests from existing clients</b> <b>More first-time users</b> <b>More children</b> <b>More employed persons</b>
<b>The frequency with which the food bank or its agencies had to turn people away:</b>	<b>Occasionally</b>
<b>The frequency with which the food bank or its agencies had to reduce the amount of food available per person or household:</b>	<b>Occasionally</b>

**Additional Comments:**

*There has been an increase in unemployment increase in Clinton, Brown and Highland counties due to shipping company closing.*
