

## Economic Impact Survey 2009: Food Bank Response

### *How current economic conditions are impacting the emergency food system served by the Mid-Ohio Foodbank*

Feeding America is the nation’s largest domestic hunger-relief organization, serving an estimated 25 million low-income Americans each year through its network of 205 food banks and their 63,000 charitable feeding agencies, including food pantries, soup kitchens, and homeless shelters.

The current recession and the rise in unemployment are having a profound effect on the nation’s food banks. In early September 2009, Feeding America conducted a brief survey of food bank members to learn more about the challenges faced by food banks, their member agencies, and clients served. A total of 176 food banks participated in the survey. What we found was that 99% of all participating food banks reported increases in demand for emergency food assistance over the last year. The average increase in demand across the network from Summer 2008 to Summer 2009 was 30%. However, the increase in need for services over the last year varies across the nation, ranging from 5% in some areas to more than 150% in others. Local economic circumstances, such as plant closings, can have a significant impact on need but it is also clear that high unemployment across the nation – which reached 9.7% in August – is a critical factor in the rising need for emergency food.

It’s becoming increasingly more difficult for many food banks and their agencies to meet the needs of their clients, especially when new clients arrive all the time. Despite the fact that the nation’s food banks delivered 2.63 billion pounds of food between July 2008 and June 2009 – an increase of 21.4% over the prior year --many are struggling to meet this increase in demand.

Here is a snapshot of what the Mid-Ohio Foodbank has witnessed and reported over the past year in the community it serves.

<b>Estimated increase in demand or need for emergency food assistance:</b>	<b>Comparing June 2008 to June 2009, the latest month we have complete statistics for: there was a 9% increase in requests for assistance at food pantries. This is after a 14% increase 2008 over 2007 requests. At meal sites, there was a 16% increase in meals.</b>
--	---

<p><b>Local factors impacting changes in demand:</b></p>	<p>Food requests at Mid-Ohio Foodbank's network of food pantries were at an all-time high in 2008, up 14% over numbers reported for 2007. But these numbers do not reflect the effects of the worsening economic situation we see daily--Ohio unemployment in July hit 11.2%, the highest its been in 26 years. We've just looked at statistics for June and see a 9% increase at food pantries over last June. Meal sites served nearly 300,000 meals in June this year -- a 16% increase over June 2008.</p>
<p><b>Critical trends contributing to increased need for emergency food:</b></p>	<p>Unemployment Underemployment Mortgage/Rent Costs Cost of Health Care</p>
<p><b>Client trends include:</b></p>	<p>More requests from existing clients More first-time users More employed persons</p>

**Additional Comments:**

*Continuing high unemployment, 11.2% -- well above the national average. Major plant closings plague our eastern service area where there are few remaining manufacturing facilities after the coal and steel industries have been decimated in the last twenty years.*
